10002	Foodstuffs which endanger health or are not suitable for consumption, are regarded as unsafe and may not be placed on the market respectively must be withdrawn from marketing.	VO (EG) Nr. 178/2002	Art. 14 Abs. 1, 2, 4, 5, 7, 8, 9 + LFGB §12
10005	If a foodstuff is discovered to be unsafe then the whole batch to which it belongs is unsafe and must not be placed on the market respectively must be withdrawn from marketing. This may only be dispensed with if it can be discovered by exhaustive testing that the other foodstuffs in the batch are safe.	VO (EG) Nr. 178/2002	Artikel 14 Abs. 6
30283	ALTS recommendations for the assessment of food as unsafe on the basis of certain microbiological findings The ALTS recommendations for the assessment of food as unsafe on the basis of certain microbiological findings are recommended to the experts for use. www.bvl.bund.de/alts	ALTS	2020/86/39
10004	When assessing whether a foodstuff is „safe“ in the sense of RE (EC) No. 178/2002, the interpretation of the AFFL regarding this legal regulation must be taken into account. (AFFL = Länderarbeitsgemeinschaft Verbraucherschutz Arbeitsgruppe Fleisch- und Geflügelfleischhygiene und fachspezifische Fragen von Lebensmitteln tierischer Herkunft; National Working Group for Meat and Poultry Hygiene and expertise regarding foodstuffs of animal origin). Additional information: AFFL Art. 14 Abs. 3_13-04	VO (EG) Nr. 178/2002	Art. 14 Abs. 3 + AFFL Art. 14 Abs. 3
10588	Foodstuffs which do not conform to the legal regulations valid in the European Union and the FRG may not be imported to Germany. To this prohibition there are exceptions: 1. if the non-conforming food is lawfully produced or marketed in another member state or contracting state to the EEA Agreement, it is also marketable in FRG as long as there is no danger to health. 2. if a general application was published by the ministry in the Federal Gazette it may be imported. The list of valid general applications can be accessed at www.bvl.bund.de	LFGB	§ 53 Abs. 1, § 54 Abs. 1
10994	After expiry of the use by date, a foodstuff counts as unsafe in the sense of Article 14 Paragraph 2 to 5 of RE (EU) No 178/2002 and is subject to marketing prohibition of Article 14 Para 1 RE (EU) No 178/2002. Additional information: VO (EU) Nr. 1169/2011 Anhang X_12-11	VO (EU) Nr. 1169/2011	Art. 24 Abs. 1
10007	No products may be manufactured, treated or placed on the market which are not food but which could be mistaken for food.	LFGB	§ 5 Abs. 2
11400	Foods that are discarded with liquid nitrogen shortly before release (Dragon Breath) are considered unsafe. Additional information: BfR Dragon Breath_21-05	BfR Dragon Breath	
50935	Edible food contact materials and articles such as edible drinking straws must meet all the legal requirements for a foodstuff.	ALS	2020/07

10012	Food must not be placed on the market if the maximum level allowed of the following substances, respectively their conversion or reaction products, is exceeded: plant protection agents (pesticides), fertiliser, plant or soil treatment substances, substances for protection of stored goods, for pest control and similar substances.	LFGB	§ 9 Abs. 1
10013	Food must not be placed on the market if non-authorized pesticides are present in or on them. However, if there is a maximum concentration for a non-authorized pesticide then the food may contain the pesticide up to that maximum.	LFGB	§ 9 Abs. 1
40495	Vegetable and animal foodstuffs which are listed in Annex I of RE (EU) No 396/2005 regardless whether fresh, processed or combined must conform to the requirements of this regulation and adhere to the highest amounts of the Annex. Under the following web address the highest concentrations regarding product and ingredients can be accessed at: http://ec.europa.eu/food/plant/pesticides/eu-pesticides-database	VO (EG) Nr. 396/2005	Art. 2 Abs. 1
40505	It is prohibited to process products (even processed and/or combined) which do not conform to the highest residue concentrations laid down in the Annexes II or III of RE (EC) No 396/2005 and/or to mix them for dilution purposes with the same product or with other products. The highest concentrations relating to products and substances can be accessed at the following address: http://ec.europa.eu/food/plant/pesticides/eu-pesticides-database	VO (EG) Nr. 396/2005	Art. 19
40499	For a number pesticide residues, no highest concentrations must be observed. These are listed in Annex IV of RE (EC) No 396/2005. The highest concentrations relating to products and substances can be accessed at the following address: http://ec.europa.eu/food/plant/pesticides/eu-pesticides-database	VO (EG) Nr. 396/2005	Art. 5
40506	If for processed and/or combined foodstuffs no the highest residue concentrations have been laid down then the highest residue concentrations laid down in the Annexes II or III of RE (EC) No 396/2005 for the corresponding products apply whereby the changes to the pesticide residue concentrations caused by processing and/or mixing are to be taken into account. The highest concentrations relating to products substances can be accessed at: http://ec.europa.eu/food/plant/pesticides/eu-pesticides-database The BfR provides a collection of processing factors under the following link: https://www.bfr.bund.de/cm/343/bfr-datensammlung-zu-verarbeitungsfaktoren.xlsx	VO (EG) Nr. 396/2005	Art. 20 Abs. 1
40514	The RHmV applies further to the EU unregulated areas. If a highest concentration exists for a pesticide in RE (EC) No 396/2005 as well as in the RHmV he the limit value of the EU-regulation applies. For pesticides however which are not covered by RE (EC) No 396/2005 the limit values of RHmV apply. Additional information: RHmV_10-05	RHmV

General principles- Labelling and presentation of food

Article No.:

req. no.	Statutory requirement	Law	Article
11230	The mandatory labeling elements of Regulation (EU) No 1169/2011 and the legal acts based thereon must be in German for the German market. Exception: Food in air traffic may be labeled in another easily understandable language; However, the allergen labeling must be written in German.	LMIDV	§ 2 Abs. 1, 2
11260	Name of the food in German language Decision of the ALTS = Arbeitskreis der auf dem Gebiet der Lebensmittelhygiene und der vom Tier stammenden Lebensmittel tätigen Sachverständigen (working group of authorities on food hygiene and animal based food) A name of a food (which is mandatory pursuant to Art. 9 (1) a RE (EG) No 1169/2011) originating from a foreign language is regarded as belonging to the German language if it is both customary in Germany and easily understood by consumers. Such names are usually covered in the "Leitsätze des Deutschen Lebensmittelbuches" (Guidelines of the German Food Book), in relevant encyclopaedias or in adequate German dictionaries. Using a name originating from a foreign language is only possible if a trade standard regarding the composition of the designated food is associated with that name. This does not imply that every foreign denomination in the beforementioned encyclopaedias and dictionaries can be seen as a customary name.	ALTS	80/02 + LMIDV § 2
20531	The LMIV applies to all foodstuffs -which are determined for the end user -which are supplied to caterers of communal provisioning; -which are given over to transport companies if the point of departure is in the EU. The LMIV applies fundamentally for prepacked and loose goods. Regarding loose goods there are special regulations and exceptions.	VO (EU) Nr. 1169/2011	Art. 1 Abs. 3
10935	The foodstuff dealer or importer under whose name the foodstuff is marketed (manufacturer on the label), is responsible for the presence and legal conformity of the labelling, presentation and advertising.	VO (EU) Nr. 1169/2011	Art. 8 Abs. 1,2
10022	Foods which are legally placed on the market which, however, do not conform to the regulations of LFGB or to one of the legal regulations passed on the basis of this law must bear identification of the deviation in so far as this is necessary for the protection of the consumers.	LFGB	§ 54 Abs.4
20532	If a particular legal regulation of the Union contains labelling requirements (e.g. for honey and dairy products) these are to be applied independently of the LMIV.	VO (EU) Nr. 1169/2011	Art. 1 Abs. 4

10933	Various information relating to foodstuffs (labelling, presentation, advertising); - must not be misleading - must be relevant, clear and easily understandable for the consumer - must not refer to human illnesses (excepted are natural mineral water, food for special groups. related statements). For the presentation of foodstuffs the following are particularly important: the form, the appearance, the packaging, the packaging material used, and the type of organisation and framework of the presentation.	VO (EU) Nr. 1169/2011	Art. 7 Abs. 1, 2, 3, 4
10015	It is prohibited to place food on the market if their information on food: - are misleading, - refer to human disease. Not affected by this prohibition are: - Certain information with respect to human diseases, which are specifically permitted in product specific regulations for natural mineral waters and foods for special groups of consumers, - Approved nutrition and health claims.	LFGB	§ 11 Abs. 1
10006	The labelling, advertising and presentation of foodstuffs must conform to their real texture. To this belong shape, appearance, packaging, packaging materials, the framework within which they are offered as well as the information distributed about the product.	VO (EG) Nr. 178/2002	Artikel 16
10003	Statements and notices concerning foodstuffs (e.g. recommendations for preparation) must be so designed that the user gains all the information required to use or consume a safe foodstuff.	VO (EG) Nr. 178/2002	Artikel 14 Abs.3
10938	On the external packaging the following obligatory statements must be present: - designation of the foodstuff - use by date or sell by date - where applicable storage conditions/ conditions of use - address of the foodstuff company.	VO (EU) Nr. 1169/2011	Art. 8 Abs. 7
10951	The obligatory statements for foodstuffs must be available and easily accessible. -for prepacked foodstuffs the obligatory statements are to be placed directly on the packaging or on a label affixed to it -for non prepacked foodstuffs (loose goods) particular conditions apply which are shown in the product areas for loose goods.	VO (EU) Nr. 1169/2011	Art. 12 Abs. 1
10937	The obligatory statements from LMIV can in the following cases be present on the prepackaging or on a label attached to it also on the trade documentation belonging to it: -prepackaged foodstuffs at all levels from wholesaler to retailer -prepackaged foodstuffs for caterers for food for large groups who prepare this or further process it. The trade documentation must either accompany the supply or be sent before or with the delivery.	VO (EU) Nr. 1169/2011	Art. 8 Abs. 7

Article No.:

req. no.	Statutory requirement	Law	Article
10955	For prepacked foodstuffs the following must appear in the same field of vision: - designation - net filling amount - where applicable the alcohol concentration.	VO (EU) Nr. 1169/2011	Art. 13 Abs. 5
10960	As designation of a foodstuff the following is to be stated: -the legal name laid down -where this is missing then the normal trade designation or a descriptive designation. Foreign designations are alternatively permitted. Should the foreign designation not permit the actual type of foodstuff to be recognisable and the foodstuff could thereby mistaken for something else, the designation must be supplemented by descriptive information which is to be affixed near the designation. Not permitted are foreign designations whose supplementary notice is insufficient to inform the consumer correctly. Trade brands, fantasy names etc., cannot replace the designation of the foodstuff.	VO (EU) Nr. 1169/2011	Art. 17 Abs. 1, 2, 3, 4
30282	LMIV - Designation of foodstuffs - Uniform font size, font colour, font background and font shape Statement of the Working Group of Food Chemistry Experts of the German Federal States and the Federal Office of Consumer Protection and Food Safety (ALS): Different font sizes, font colours, font backgrounds and font shapes are generally used as stylistic devices and can separate related information from each other in such a way that it is no longer perceived as a unit. If the difference in font size is less than 50%, it must be assumed, taking into account the overall presentation, that the designation as mandatory information is not separated, the eye is not distracted by it and the information is sufficiently clear. The designation is then still perceived as a unit by the consumer. In order to comply with the labelling requirements for information according to Art. 13 and, if applicable, Art. 7 of Regulation (EU) No. 1169/2011, the difference in font size of the word components of a designation of a foodstuff, taking into account the font shape, the font colour and the font background, shall not exceed 50 % as a rule. These requirements also apply to any repetition of the designation. The special requirements for the so-called imitation regulation and minimum font size remain unaffected.	ALS	2021/01
10982	The amount label (QUID) of ingredients or ingredient classes is required if these: -are named in the designation of the foodstuff -are normally put into contact with the foodstuff -are highlighted in the labelling by words, illustrations or graphic representations -or is of essential importance for the characterisation of a foodstuff and important for distinguishing it from other products. Exceptions to this and regulations regarding type and manner of this obligatory statement are listed in Annex VII LMIV. For foodstuffs of only one ingredient the QUID-label is not relevant. 11175	<p>LMIV - Voluntary repetition of the calorific value in the nutrition declaration</p> <p>Opinion of the Working Group Food Chemistry Expert of the federal states and the Federal Office for Consumer Protection and Food Safety (ALS):</p> <p>According to Annex XV of Regulation (EC) No 1169/2011 (LMIV), the calorific value in the nutrition declaration shall be expressed as "energy" in kJ / kcal. The word "energy" is therefore formally prescribed for each, also for a voluntary additional indication of the calorific value. However, since the dimension kJ / kcal can relate only to the calorific value, so no confusion of the indication with nutrient or other ingredients of the foodstuff is possible. In addition, the correct, complete indication of the calorific value is available elsewhere on the packaging. Therefore, from the point of view of the working group, the repetitive indication of the calorific value in the form of a tint in the main field of view can be tolerated with the quantities in the dimensions kJ / kcal per 100 g or per portion without specification of the word "energy".</p>	ALS	2016/09 + VO (EG) Nr. 1169/2011
11271	<p>RE (EU) No 1169/2011 – Repetition of the energy value in the principal field of vision</p> <p>When the energy value is repeated multiple times in the principle field of vision, the requirements of Section 3 RE (EU) No 1169/2011 must be met for each repetition. (Decision of the ALS = Arbeitskreis Lebensmittelchemischer Sachverständiger der Länder und des Bundesamtes für Verbraucherschutz und Lebensmittelsicherheit (Working group of food chemistry authorities of the federal states and the federal office for consumer protection and food safety)).</p>	ALS	2018/01 + VO (EU) Nr. 1169/2011
30247	<p>Nutrition labelling information in the principal field of vision of food</p> <p>Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: The declaration of a single nutrient content is regarded as a repetition (Art. 30 (3) of Regulation (EU) No 1169/2011. The voluntary repetition of the nutrition declaration does not allow the labelling of a single nutrient content, as the information to be provided would be either the energy value alone or the energy value together with the amounts of fat, saturates, sugars and salt. However, the label can include the declaration of a single nutrient content when this declaration is required by law. If the single nutrient content is given in connection with an authorised nutrition claim or with a specific reference to an authorised nutrition claim in the annex of Regulation (EC) No 1924/2006 this would be not regarded as a repetition of the nutrition declaration but as an addition of the nutrition claim.</p>	ALS	2020/02 + Art. 30 Abs. 3 VO (EU) Nr. 1169/2011

40876	<p>Nutrition claims</p> <p>Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer:</p> <p>1. Not considered to be a nutrition claim is certain information concerning the absence of substances which are not already covered by special legal requirements and which are directed at people with a sensitivity, intolerance or allergy to one of these substances, for example.:</p> <ul style="list-style-type: none"> - lactosefree, - free of lactic protein - contains no soy protein - iodine free. <p>If these substances are naturally not contained in the product, then an appropriate supplementary statement must be added, for example "naturally free of iodine".</p> <p>The statement "glutenfree" is regulated by RE (EU) No 828/2014.</p> <p>2. A substance contained in an ingredient of a food which is regarded as an „other substance“ is promoted with a claim like „(the ingredient) naturally contains (constituent substance)“.</p> <p>Then this claim is regarded as a nutrition claim. It implies that the finished product has also these beneficial nutritional properties.</p> <p>Examples:</p> <ul style="list-style-type: none"> - Soy naturally contains isoflavone (for a soy containing food) - tomatoes naturally contain lycopin (for tomato ketchup) <p>3. The following statements are considered to be nutrition claims and are further prohibited :</p> <ul style="list-style-type: none"> - statements about the low content or absence of cholesterol (cholesterol reduced, low level of cholesterol, cholesterolfree - "without trans-fatty acids". 20552	The following may be consulted for assistance in interpreting LMIV: - the question and answer catalogue of the Commission regarding RE (EU) Nr. 1169/2001 (Q&A LMIV) - the guideline of FDE (Food Drink Europe) and Eurocommerce regarding RE (EU) Nr. 1169/2011 (Guidance LMIV). Additional information: LMIV F&A deutsch_18-05 LMIV Leitfaden deutsch_16-05	VO (EU) Nr. 1169/2011	+ LMIV F&A, LMIV Leitfaden
30212	iodised food grade salt Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: „iodised food grade salt“ can be used as the specific name of the ingredient in the list of ingredients of the finished food product according to Art. 18 No. 2 of RE (EU) No. 1169/2011. The single ingredients of the salt have to be given too. Packages of iodised food grade salt intended for the final consumer need also to be labelled with a list of ingredients.	ALS	2019/72 + VO (EU) Nr. 1169/2011
30215	Labelling of the ingredient „herbs“ in the list of ingredients Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer Annex VII Part B of RE (EU) No. 1169/2011 contains „spices“ and „herbs“ as categories of food. If a product contains both ingredients, spices and herbs, also both designations have to be labelled in the list of ingredients.	ALS	2019/20 + VO (EU) Nr. 1169/2011
30214	Name of the food for fibre Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: The name „plant-based fibre“ is not a sufficient name of the food according to Art. 9 paragraph 1 point a and Art. 17 of RE (EU) No. 1169/2011. The name „plant-based fibre“ is the name for a class of substances and does not enable consumers to know its true nature and distinguish it from other products with which it might be confused.	ALS	2019/16 + VO (EU) Nr. 1169/2011
30226	Designation „natural fruit sweetener“ or „natural fruit sweetener from apple juice concentrate“ Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: The designation „fruit sweetener“ is not a sufficient name of the food according to Art. 17 of RE (EU) No. 1169/2011. It does not enable consumers to know the true nature of the ingredient and distinguish it from other products with which it might be confused. As sweet fruit concentrates can be obtained from different sources, the raw material has to be given like „fruit sweetener from apple juice concentrate“. The use of the term „natural“ or similar statements contradict the high technological effort of the production of fruit sweeteners.	ALS	2019/23

10887	<p>Fibre in meat products and other food</p> <p>Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer:</p> <p>Fibres from wheat staw, oat fibres and other sources may not be used as additives with technological purposes as they are currently not approved. An addition of these fibre materials, namely as a nutrient is possible, if the product via this addition contains a total fibre amount, which enables the foodstuff as to be considered as "source of fibre" according to RE (EC) No 1924/2006 (3 g/100 g or 1,5 g/100 kcal). For products with fewer content of fibre it has to be tested whether their consumption can perform a significant contribution to the recommended fibre intake (at least 10% of the D-A-CH-recommendation of 30 g/day). Otherwise one must suppose this regularly to be an overwhelmingly technological and therefore not approved purpose of the additives in question.</p> <p>Example:</p> <ul style="list-style-type: none"> - Chicken Nuggets with 7% wheat fibre fulfil the requirements of "high fibre content"; the addition conforms to the regulations - Münchner Weißwurst (white sausages) with oat fibres and a concentration of fibre of 1,0 g/100 g product does not fulfil the requirements; the addition is not legal as this is regarded as a technological purpose. - patty of processed cheese with 0,9% up to 1,5% oat hull fibre and a total content of fibre of 5 up to 7% conforms to the regulations. It is to be assumed that it is used as nutrient. - Eiswaffelhörnchen (icecream-cones) with 1% wheat straw fibre as firming agent do not fulfil the regulation because the use as firming agent is a technological use and not permitted. 10772	Only those additives listed in Annex II Part B to RE (EC) No 1333/2008 are approved for foodstuffs. The additives listed there may only be used in the foodstuffs and according to the conditions named in Annex II Part E. Which additives may be added to which individual foodstuffs and under which conditions may be ascertained from the databank of the EU in the internet under: https://webgate.ec.europa.eu/foods_system/main/?event=display	VO (EG) Nr. 1333/2008	Art. 4 Abs. 1,5 Art. 5
11061	There is more detailed description of the food categories which listed in Annex II Part E of Regulation (EC) No 1333/2008 in the guideline of the European Commission (Guidance Document Describing the food categories in Part E of Annex II to Regulation (EC) No 1333/2008 on food Additives). Additional information: Guidance food categories VO (EG) Nr. 1333 2008_17-11	VO (EG) Nr. 1333/2008	+ Guidance food categories VO (EG) Nr. 1333/2008
10773	The highest amounts for additives listed in Annex II to RE (EC) No 1333/2009 refer to foodstuffs place on the market. For dried /concentrated foodstuffs, however, the highest amounts refer to the reverse diluted foodstuffs (take into account the lowest dilution factor). Which additives with which conditions of use may be added to which individual foodstuffs may be ascertained from the databank of the EU on the internet under: https://webgate.ec.europa.eu/foods_system/main/?event=display	VO (EG) Nr. 1333/2008	Art. 11 Abs.3
10780	The traditional foodstuffs which are listed in Annex IV of RE (EC) No 1333/2008 are subject to possibly stricter regulations concerning additives in the individual member states, e.g. Beer brewed according to the German purity laws, bread according to French tradition or Italian mortadella. Additional information: VO (EG) Nr. 1333/2008 Anhang IV	VO (EG) Nr. 1333/2008	Art. 20
20476	The list of approved additives (RE (EC) No 1333/2008 Annex II Part E) is organised according to foodstuff categories. For each of the 18 foodstuff categories (for example, dairy products and similar, sweets, fruit and vegetables) the approved additives and their conditions of use are listed up. The list of foodstuff categories is to be found in Annex II Part D of Re (EC) No 1333/2008. 10778	For the indirect transfer of additives the following applies: pre-products for combined foodstuffs may contain additives which are not approved for the pre-product itself but for the end-product. Additives which are approved for a pre-product may come into the end-product with this even if they are not approved for the end-product. They must not however fulfil a technological function there. For baby and infant nutrition this is only valid in specifically mentioned exceptional cases. In Annex II Part A Table I and 2 of RE (EC) No 1333/2008 the combination foodstuffs are listed to which this migration basis does not apply. Additional information: VO (EG) Nr. 1333/2008 Anhang II Teil A_20-11	VO (EG) Nr. 1333/2008	Art. 18 Abs. 1,2,3
10779	The indirect transfer of sweetening substances is permitted in the following combined foodstuffs even if the additive fulfils a technological function: <ul style="list-style-type: none"> - foodstuff without sugar additive, - reduced calorific foodstuff, - foodstuff for reduced calorie nutrition, - non-kraioegen foodstuff, - food with extended sell-by date. 	VO (EG) Nr. 1333/2008	Art. 18 Abs. 1, 4
20481	Regulations for aluminium-lakes: Only those aluminium lakes are approved which were manufactured from dye substances listed in Annex II Part A Table 3 of RE (EU) No 1333/2008. They may only be used for those foodstuff categories for which in Part E highest amount limitations for aluminium from lakes have been expressly laid down. 10887	<p>Fibre in meat products and other food</p> <p>Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: Fibres from wheat staw, oat fibres and other sources may not be used as additives with technological purposes as they are currently not approved. An addition of these fibre materials, namely as an nutrient is possible, if the product via this addition contains a total fibre amount, which enables the foodstuff as to be considered as "source of fibre" according to RE (EC) No 1924/2006 (3 g/100 g or 1,5 g/100 kcal). For products with fewer content of fibre it has to be tested whether their consumption can perform a significant contribution to the recommended fibre intake (at least 10% of the D-A-CH-recommendation of 30 g/day). Otherwise one must suppose this regularly to be an overwhelmingly technological and therefore not approved purpose of the additives in question.</p> <p>Example:</p> <ul style="list-style-type: none"> - Chicken Nuggets with 7% wheat fibre fulfil the requirements of "high fibre content"; the addition conforms to the regulations - Münchner Weißwurst (white sausages) with oat fibres and a concentration of fibre of 1,0 g/100 g product does not fulfil the requirements; the addition is not legal as this is regarded as a technological purpose. - patty of processed cheese with 0,9% up to 1,5% oat hull fibre and a total content of fibre of 5 up to 7% conforms to the regulations. It is to be assumed that it is used as nutrient. - Eiswaffelhörnchen (icecream-cones) with 1% wheat straw fibre as firming agent do not fulfil the regulation because the use as firming agent is a technological use and not permitted. 	ALS	2019/69 + VO (EG) Nr. 1333/2008

30083	<p>Indication of steviol glycosides</p> <p>Decision of the ALS = Working group of food chemistry experts from the federal states and the Federal Office of Consumer: Steviol glycosides are food additives in the sense of RE(EC)No 1333/2008. The name is "steviol glycoside". In the list of ingredients of foodstuffs they have to be indicated as „sweetener steviol glycoside“ or „sweetener E960“ according to Art. 18 par. 4 and Annex VII part C of RE (EU) No. 1169/2011. Any further statements which emphasize the natural character of the sweetener are not permitted. The additive may contain residues of ion-exchange resins used in the manufacturing process and several other related steviol glycosides may be generated as a result of the production process, which do not occur naturally in the Stevia rebaudiana plant. The substance mixture appropriate to the specification in RE (EU) Nr. 231/2012 differs from the steviolglycoside occurring in the plant and is therefore not "natural". The raw material from which the sweetener has been extracted can be indicated outside the list of ingredients via statements like "Steviol glycosides (sweetener) from the stevia plant (from stevia leaves)" and "Steviol glycosides (sweetener) of vegetable origin".</p> <p>Prominent pictorial presentations or symbols of the stevia plant or the stevia leaves are regarded as misleading, if a notice regarding sweetening through the additive steviol glycoside is not attached with comparable prominence in the close proximity.</p>	ALS	2019/22 + VO (EG) Nr. 1333/2008
10658	<p>Foodstuffs containing a colouring which is listed in RE (EC) No 1333/2008 Annex V must bear the following warning notice: "Bezeichnung oder E-Nummer des Farbstoffs/der Farbstoffe: Kann Aktivität und Aufmerksamkeit bei Kindern beeinträchtigen." (= "Designation or E-number of the colouring /colourings: May affect activity and attention span of children."). The warning notice must be easily comprehensible and affixed in an easily visible position, clearly legible and non-smudge Stelle deutlich. It must on no account be covered or separated by other statements or illustrations.</p> <p>Exceptions:</p> <ul style="list-style-type: none"> - Alcoholic beverages with more than 1.2 vol% do not require to bear this label. - Boiled and dyed eggs are not affected by this regulation. <p>Colouring may also be used for stamping meat labelling without a warning notice being affixed.</p> <p>Additional information: VO (EG) Nr. 1333/2008 Anhang V_10-05</p>	VO (EG) Nr. 1333/2008	Art. 24 Abs. 1,2

11189	<p>Eggshells (Putamen ovi) as a possible raw material source for calcium carbonate as a food additive</p> <p>Opinion of the Working Group Food Chemistry Expert of the Länder and the Federal Office for Consumer Protection and Food Safety (ALS):</p> <p>1. Eggshells are not necessarily classified as animal by-products of category 3 according to Regulation (EC) No 1069/2009, but may remain an independent food after the beating and separating of the eggs. Eggshells can therefore be safe products after appropriate processing. Thus, under certain conditions, they can also serve as a raw material for the production of calcium carbonate for human consumption.</p> <p>2. Provided that significant data confirm that the composition of this raw material complies with the purity requirements of food additive E 170 (calcium carbonate) according to Regulation (EC) No 231/2012, this is not a novel food or a novel food ingredient.</p>	ALS	2016/30 + VO (EU) 2015/2283
11255	<p>Evaluation of „basic or chlorine water“ produced by electrolysis placed on the market as food</p> <p>Decision of the ALS = Arbeitskreis Lebensmittelchemischer Sachverständiger der Länder und des Bundesamtes für Verbraucherschutz und Lebensmittelsicherheit (Working group of food chemistry authorities of the federal states and the federal office for consumer protection and food safety):</p> <p>If the responsible person is not able to prove that products placed on the market as food which are produced by electrolysis of saline aqueous solution and which contain sodium hydroxide, chlorate and chlorine were consumed to a significant degree before the effective date of RE (EC) No 258/97, Mai 15th 1997, these products are regarded as novel foods within the meaning of Art. 1 (2) c of RE (EC) No 258/97 and need to be authorized.</p>	ALS	2017/37 + VO (EU) 2015/2283
11322	<p>The Joint Expert Commission on the Classification of Substances has come to the following assessment of curcumin: It isn't considered to make sense that a classification of curcumin-containing products as functional medicinal products. A therapeutic efficacy has not been sufficiently proven yet. Classification as a traditional herbal medicinal product is not possible because the products do not meet the criteria of the monograph on the rhizome of Curcuma Longa L. If it is classified as a food, it must first be clarified whether it is a novel food. The assignment to one of the categories of Regulation (EU) 2015/2283 (Novel Food Regulation) must be checked on a case-by-case basis, because the increased bioavailability is achieved with the use of different technological processes. So far, an application was submitted for approval as a novel food for no corresponding product.</p> <p>Additional information: BVL Curcumin_21-05</p>	BVL Curcumin

40866	Beverages or pre-mixtures for drinks which could be confused with viticulture products, aromatised wine, aromatised wine cocktails or beverages containing wine may not be placed on the market. Regarding this ALS has officially decided: the term "Sekt" stands legally as a synonym for quality sparkling wine. The use of this term for other products which could be confused with sparkling wine is prohibited e.g. "Blütensekt" (blossom sekt) (ALS = Arbeitskreis Lebensmittelchemischer Sachverständiger der Länder und des Bundesamtes für Verbraucherschutz und Lebensmittelsicherheit)	WeinG	§ 26 Abs. 2 + ALS 2011/31
40867	The words Wein, Kabinett, Spätlese, Auslese, Beerenauslese, Trockenbeerenauslese and Eiswein from the wine laws are protected terms. They may only be used for products which are not viticulture products if this is expressly intended in a regulation. It is for example prohibited to connect the word "Kabinett" with the name or designation of a mineral water or to use "Auslese" to indicate a certain quality for a fruit juice. For fruit wines, however, the word "Wein" may be used. "Brandwein" (brandywine) is an approved trade designation for a spirit. Prohibited, however, are "Kirschbranntwein" (cherry brandy), "Kernobstbranntwein" (pomaceous fruit brandy) and Zwetschgenbranntwein (damson brandy) as well as "Kornbranntwein" (corn brandy).	WeinG	§ 26 Abs.1

Energy Drinks

Article No.:

Energy drinks are beverages containing caffeine mostly together with taurine, inosit and glucuronolacton, often in high concentrations

req. no.	Statutory requirement	Law	Article
30069	Energy drinks count as refreshment beverages containing caffeine. In addition to caffeine they contain one or more substances listed in Annex 8 Part B of FrSaftErfrischGetrV. The highest concentrations of these substances laid down in the Annex must be adhered to. Energy drinks do not have to demonstrate high calorific value. Also corresponding beverages with addition of sweeteners instead of sugar count as energy drinks. Additional information: FrSaftErfrischGetrV Anlage 8_12-11	FrSaftErfrischGetrTeeV	§ 4 Abs. 2, § 5 Abs. 2
30068	Refreshment beverages containing caffeine including energy drinks may not exceed the highest concentration of caffeine laid down in in Annex 8 Part A of FrSaftErfrischGetrV. Additional information: FrSaftErfrischGetrV Anlage 8_12-11	FrSaftErfrischGetrTeeV	§ 5 Abs. 1
30067	Refreshment beverages containing caffeine including energy drinks may not contain alcohol. An alcohol concentration up to 2g/l will be tolerated if this - is based on the use of flavourings; -or through natural and unavoidable fermentation processes is contained in the ingredients used.	FrSaftErfrischGetrTeeV	§ 4 Abs. 1
30070	The designation "energy drink" can be used additionally for the legally required designation "refreshment beverage containing caffeine" but may not replace this.	FrSaftErfrischGetrTeeV	§ 4 Abs. 2
10946	Obligatory statement for beverages beverage concentrates, beverage powder etc. which in ready to drink containing more than 150 mg/l caffeine:" High caffeine content. Not recommended for children or pregnant or breast-feeding women (xxx mg/ 100 ml)" in the same field of vision as the name of the beverage. xxx= caffeine content present. The notice is not required for coffee or tea-based beverages where the terms "coffee" or "tea" are the names of the beverage, e.g. coffee granules. Herbal infusions (e.g. paraguay tea) are not covered by that exemption. Beverages containing less than 150 mg/l caffeine should not bear the notice. Additional information: VO (EU) Nr. 1169/2011 Anhang III_14-04	VO (EU) Nr. 1169/2011	Art. 10 Abs. 1, Anhang III Nr. 4 + ALS 2019/21 + ALS 2017/7
10826	Energy shots (energy drinks in small portion units 25-75 ml) with clearly higher caffeine concentrations and in part higher taurin concentration) are according to the statement of the federal office for Risk Analysis (BfR) not safe foods. Appropriate recommendations for use in the labelling is not sufficient. Additional information: BfR Energy shots_10-05	BfR Energy shots

Article No.:

Foods labelled "gluten-free" / "lactose-free"

req. no.	Statutory requirement	Law	Article
30166	Milk products of Annex 1 MilchErzV with a reduced lactose content may only be labelled with a comment regarding the absence of lactose when the lactose content is below 0.1 gramm per 100 gramm of the finished product. The labelling has to contain a statement like „Laktosegehalt: unter 0,1 g/100 g“ (=lactose content below 0.1g / 100g) or a similar indication.	MilchErzV	§ 4 Abs. 2
30167	Cheese or cheese products with a reduced lactose content may only be labelled with a comment regarding the absence of lactose when the lactose content is below 0.1 gramm per 100 gramm of the finished product. The labelling has to contain a statement like „Laktosegehalt: unter 0,1 g/100 g“ (=lactose content below 0.1g / 100g) or a similar indication.	KäseV	§ 15 Abs. 6
30188	Labelling of lactase in the list of ingredients of lactose-free milk Decision of the ALTS = Arbeitskreis der auf dem Gebiet der Lebensmittelhygiene und der vom Tier stammenden Lebensmittel tätigen Sachverständigen (working group of authorities on food hygiene and animal based food): In this case without lactase no reduction of lactose content or lactose-free products can be obtained. Therefore it is not relevant if lactase is still technologically or enzymatically active in the final product. So lactase can not be classified as processing aid and is not affected by Art. 20 (b) (ii) of Regulation (EU) No 1169/2011 regarding the omission of constituents of food from the list of ingredients. Lactase has to be given in the list of ingredients according to Art. 18 of Reg (EU) No 1169/2011.	ALTS	82/14 + VO (EU) Nr. 1169/2011 Art. 20
30204	Use of the claim „lactose-free“ for raw ham Decision of the ALTS = Arbeitskreis der auf dem Gebiet der Lebensmittelhygiene und der vom Tier stammenden Lebensmittel tätigen Sachverständigen (working group of authorities on food hygiene and animal based food): Lactose is used for the production of raw cured meat products, even if it is used only to a very small extent. So there is the possibility for producers to use the claim „lactose-free“ for raw cured meat products. The claim is not misleading by suggesting that the food possesses special characteristics when in fact all similar foods possess such characteristics (§ 11 paragraph 1 No. 3 LFBG and Art. 36 paragraph 2a) in connection with Art. 7 paragraph 1c) of RE (EU)No 1169/2011).	ALTS	83/08 + VO (EU) Nr. 1169/2011 Art. 7 Abs. 1c
